Subject: Recycle Content in our finished products

To Whom It May Concern:

With regards to your requested information of recycle content in our finished products, steel reinforced concrete deformed bars , we would like to inform that they are mostly produced from recycle material which are steel scrap. In our manufacturing process, the steel scrap is melted by Electric Arc Furnace to be the steel billets. Then the steel billets are transformed by rolling mill to be hot rolled deformed bars as the finished product. Therefore, our products are made of recycle material.

Should you have any questions, please do not hesitate to contact us. Thanks for your consideration in our products.

Sincerely Yours,

Parinya Paisansrisin

Managing Director

Paisan Steel Ltd.
