Subject: "T" Symbol on the Steel Reinforced Concrete Deformed bars

First of all we would like to thank you for your continued support in using our products. As per your question about the symbol "T" on our Steel reinforced concrete deformed bars, we would like to inform that they are made through Temp Core process or Thermal Mechanical Treatment (T.M.T.) based on the Thai Industrial Standards TIS.24-2559. This process will provide steel with higher yield and tensile strength and elongation with better bending and welding quality.

Paisan Steel Ltd has started producing grade "SD40" and grade "SD50" with symbol "T" on the steel bars since year 2014 and year 2018 respectively.

#### Production details

Produced by Temp Core as follows :

- Grade SD40 T size DB12, DB16, DB20, DB25, DB28, DB32
- Grade SD50 T size DB12, DB16, DB20, DB25, DB28, DB32

Please be informed accordingly,

Yours Sincerely,

( Mr. Parinya Paisansrisin )

Managing Director
